

### **The rules:**

This game is not so much designed for an individual journey, but is one that seems to take over your motoring life!

The game is very simple - you start by finding and spotting a number plate with the number 1 in it and before you think this is too easy the number one must be on its own.

So the number plate BOB1 will get you started - however the number plate BOB11 will not. After you have spotted your number 1 you then need to find a number plate with the number 2 in it, using the same principles as described above and so on sequentially until you finish the game at 999.

The one other rule is that you can't save numbers! - What we mean by this is that if your current number is 324 and you spot a number plate with 326 in it before you spot one with 325 it doesn't count.

**HAPPY NUMBER SPOTTING - AND SAFE MOTORING!**
